## About me

Hi! I'm a passionate software developer whose always looking to improve his problem solving skills. I like to build software that creates value and those that make it easier for other developers to build software. During weekdays, I devote my time in delivering value for my company and on my free time, I like to work on my fun little open source projects (<https://github.com/jeyjeyemem> / <https://github.com/XerProjects>).
